Right now the whole country is working together to keep people safe from the Coronavirus, also called COVID-19.

Minot Air Force Base

Doctors and the government are learning more every day about all the ways we can keep ourselves safe.

Doctors know that germs can go from one person to another through tiny droplets in the air or when we touch each other. They also know that people can spread germs, even if they don't feel sick.

En.Wikipedia.com

They have already told us we can social distance or stay at least 6 feet away from other people to stay safe.

People who come closer than 6 feet for their jobs or those who want to be extra safe, can wear protective equipment like gloves and face masks.

Wearing masks, gloves and other protective equipment makes everyone a little safer.

For customers, these extra safe steps keep germs off of the items they are buying.

Masks come in all styles and colors. Some people wear the same masks as doctors. Some people use scarves or bandanas to cover their mouth and nose.

No matter what mask we see people wearing, it means they are trying to keep themselves and others safe.

Lots of people are starting to wear masks to keep themselves and everyone else safe.
